

Media Release 24 June 2024

Iress and Acre extend partnership to accelerate mortgage lending

Iress today announced that it has extended its partnership with Acre, one of the UK's fastest growing mortgage and protection platforms. Under the renewed agreement, Iress will integrate its mortgage sourcing data and Iress's Lender Connect into Acre's intermediaries software; equipping brokers with enhanced sourcing and affordability capabilities, enabling more efficient case management.

Iress's Head of Business Development, Sourcing, Warren O'Connell said, "In today's economic environment, it's essential that brokers can give their customers the most up to date and broadest range of mortgage information. Iress's collaboration with Acre, along with Iress' unmatched product coverage, ensures their brokers have as much information as possible to make informed recommendations for their customers."

Acre's CEO and founder, Justus Brown, said : "Iress has played an integral role in the Acre experience for the past two years, allowing advisors to eliminate the time-consuming process of rekeying data for every decision in principle or application. We are thrilled to be able to expand our collaboration to bring the future of mortgage and protection technology to brokers. As a result, brokers can run the entire mortgage journey in one place and secure the right deal for the customer every time, while preventing foreseeable harm."

About Acre

Acre's mission is to change the process of buying property - making owning a home faster, easier, more transparent, and ultimately cheaper for consumers. Born out of the Founders Factory incubator (in cooperation with Aviva), Acre's broker platform uses innovative blockchain technology to put detailed consumer and property data at the heart of getting a mortgage.
